Company's Description

IANUS Consulting Ltd is a SME that conducts research in the security domain, develops innovative solutions, and participates in European Research programs.

Computer Scientist – Research Team member

Location: Nicosia, Cyprus

Short job description

IANUS is looking for a talented Researcher at any level who is interested in participating in European Research projects. Candidates will become a member of a very dynamic research team, and they will be given the training, the assistance and the opportunities to develop and increase their skills in this competitive area. Candidates will be preferred if they have knowledge of European funding programs and they can engage with partner organisations and funding bodies. Candidates should be graduates of technical disciplines of well-established European Universities. Other candidates from recognised institutions are also welcome.

Job Role & Key Responsibilities

As a Research Team member, you will focus on the implementation and management of European and National research projects in the field of computer science, and cybersecurity and you will undertake the following main activities and responsibilities:

- Monitoring and follow up of project activities
- Provide inputs in scientific and research reports
- Participate in project meetings and teleconferences
- Reviewing project deliverables
- Participate in EU level working groups and platforms, representing IANUS strategic interests.

Job Requirements

- University degree in Science or Engineering is required. The possession of a M.Sc. and/or Ph.D. degrees is a plus
- Ability to multitask
- Availability to travel for partner meetings and events abroad
- Proficiency level in English.

Working with us, you will expect

- A unique opportunity for a career in a European oriented company and self-development.
- Attractive compensation package based on qualifications and experience.
- Youthful and professional work culture and environment.

- Flexible work hours.
- International and highly competitive environment in contact with leading-edge technology.
